

DLS

Delta Lighting System

The DLS incorporates our Delta Lighting Controller with a selection of relays factory installed into a protective cabinet. The DLS can contain modules that add functionality such as a keypad lighting interface or light dimming.

Save energy and provide a complete user experience in your buildings.

Key Features

Flexibility

You can purchase a Delta Lighting Controller alone, or as part of a Delta Lighting System.

Dependability

The DLS cabinet is assembled in our factory by trained professionals. It reduces setup issues and greatly speeds up installations. Relays are wired directly into the cabinet, making maintenance and troubleshooting a snap.

Do it **right.**
