

O₃ Room Controller

Modular Room Integration

The O3 Room Controller is DIN rail mountable and combines modular I/O with room-level integration.

The O3 is a complete solution that combines HVAC, access and lighting control in a modular system. It combines multiple protocols and I/O points in one unit.

Control HVAC, access and lighting with just one system.

Key Features

Universal I/O

No more inputs and outputs. Use universal points to control or read from field equipment. Reduce engineering and product costs by being able to use every point on the board.

Modular Room Integration

Connect to DALI, EnOcean and Modbus by adding modules. Control HVAC, access and lighting without having to run separate networks.

Do it right.
