enteliBUS

Modular. Expandable. Flexible.

The enteliBUS Control System is a powerful, fully programmable BACnet controller that features modular, expandable I/O. enteliBUS has hot-swappable I/O modules for fast and easy installation. With HAO switches, save your equipment from short cycling and make troubleshooting a breeze. Use enteliBUS as a BACnet router or join multiple network segments.

Join multiple network segments while reducing troubleshooting downtime.

Expandable to over I/O points

Key Features

Hot Swappable
Modules can be changed out while enteliBUS is powered. Reduce downtime for troubleshooting.

HAO Switches
Outputs use manual Hand-Auto-Off switches. You can change from Auto to On or Off without short-cycling equipment.

Do it right.
