

CULTURE & VALUES

OUR CORE PRINCIPLES

First and foremost, the Delta Controls culture is one of inclusivity and diversity. We celebrate the differences and similarities of our individuals because that diversity makes us stronger as a whole. It's the differences in perspective and the diverse experiences of our individuals that help us foster creativity and innovation. We believe that without diversity of thought, ingenuity and creativity will stagnate.

Do it **right.**

DO IT RIGHT

Do it Right is the core principle that Delta Controls was founded on, and it's still our core principle today. Do it Right is where passion meets accountability. It's a state of mind that drives our actions. It is core to every relationship we build and it's the last thought in our mind before a product goes out the door. At Delta Controls, there's no such thing as good enough.

A TEAM OF INNOVATORS

A Campus of Innovation

At Delta Controls, we're problem solvers. We find a problem and our team of experts puts the solution into motion. We're confident because we only hire the best. We come to work each day knowing that innovation is at the core of our decisions. Regardless of our role or status, our team is guided by collaboration, a commitment to doing it right, and finding real-world solutions to real-world problems.

OUR COLLECTIVE VISION

Collaboration and the free flow of ideas is what drives our team. From R&D to Sales, we're not one person delivering a single solution, we're a team of experts delivering a Delta Building. Our vision comes from our willingness to push boundaries and the strength of our partner network. Together, we're laying the foundation for the future of smart buildings.

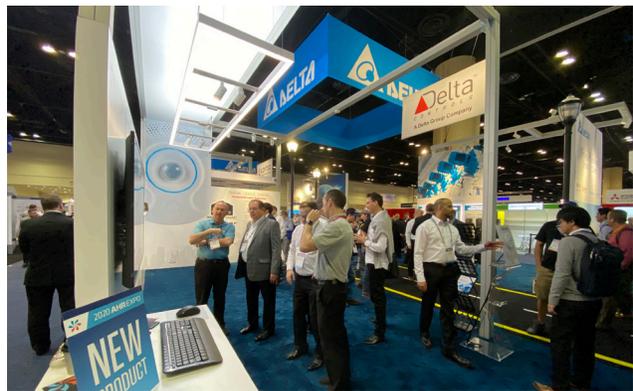

THE DELTA BUILDING

As we move into the IoT age, smart buildings will only get better at reacting to occupants. There will always be new technology that drives this ambition forward, but for a smart building to truly succeed, every device needs to be integrated.

A Delta Building is all encompassing. We bring together disparate systems under a single, efficient building automation system that's backed up with industry-leading devices. With HVAC, lighting and access integrated into your Delta Building, your building is more than smart: it's intelligent.

THE DELTA PARTNERSHIP

Our partnership is more than a network of distributors; it's a family of companies united under a single, guiding philosophy: Do it right. We only work with industry experts because that's what we expect from ourselves. Our commitment to excellence is a core value and it drives every decision we make. We stand by all our products long after we've released the newest things and this is what our partners have come to expect. If you work with a Delta Controls partner, you're working with the best.

Do it **right.**
