

Red5 Access System

Compact. Modular.

When the Red5 Access Module is added to a Red5 system, Delta Controls' building automation system is extended by integrating seamlessly with Delta Controls HVAC, Lighting and Energy Management applications. This provides total control of your facility environment, from controlled access of areas, temperature, lighting and energy monitoring, everything is under control. Our access control system offers flexible and scalable solutions to fit any security need.

Unified Access Control, Unmatched Security: The Power of Integration.

Key Features

Native interoperability with building automation management tools and system hardware.

BACnet Secure Connect ensures secure and reliable communication between devices.

Modular solution provides flexible and scalable system architectures.

Video management system integration provides greater awareness for system operators.

Support for multiple authentication methods, including biometric and mobile credentials.
