

DVC

Ensuring a Strong, Dependable Facility

Delta Controls VAV Controllers are the smart choice for any VAV project. With integrated choice of Siemens or Belimo actuators and multiple I/O options, DVCs are the fully programmable solution for any VAV configuration. Use [DVC PoE models](#) to simplify your network, reduce wiring costs and get more data from your system.

Delivering reliable occupant
comfort with precision.

Key Features

More Options. More Data.

Using Ethernet or PoE at every level of your network allows you to get more data out of your system. This makes building analytics more powerful and gets you ready for the IoT networks of the future.

Tackle Any VAV

DVCs come with multiple actuator options and I/O configurations. They're fully programmable so you can handle any configuration of VAV.
