

DELTA CONTROLS GLOBAL CONFERENCE

MAY 4TH-6TH 2023

TERRANEA RESORT
RANCHO PALOS VERDES CALIFORNIA

THE MOST EXCITING CONTROLS NETWORKING OPPORTUNITY IN 2023

YOU'RE INVITED TO OUR NEXT GLOBAL CONFERENCE!

The Delta Controls Global Conference is a prime opportunity to meet qualified buyers, discover the latest equipment and technologies, and interact with our partners and industry professionals in a relaxed environment.

During three general sessions, you'll experience larger-than-life multimedia presentations and interactive displays highlighting the newest Delta Controls products and services. You'll learn a lot in these sessions, from intelligent facility management and security strategy solutions to big data uses and everything in between. The goal is to create strong, more vital organizations through discovery, innovation and information sharing. Our main sessions are generally half-day, allowing plenty of time for networking, being active, and relaxing!

Speakers from around the globe will keep you informed, giving you a competitive edge. Past speakers from Google, Cisco, North American universities, economists, industry consulting, and more have impressed.

Equally valuable, ample networking opportunities exist to talk best business practices and share ideas. Delicious dinners and cocktail receptions are fantastic for making new contacts or meeting people you know. Utilize our excellent event app to connect, get social and organize your time.

Meet directly with many of the industry's top device and sensor suppliers during our Vendor Showcase. Each showcases its products in allocated booth space to give you insight into its equipment and devices in our exhibition hall. Yes, you'll keep learning...even through the coffee breaks.

In 2023, discover two of our most significant products to date; Red5 and the award-winning O3! We'll review the company's performance following the pandemic and all it entails.

We know you'll be brimming with new ideas to bring back to your business and colleagues! You won't regret it.
