

Proviso

Connect & Configure

The Proviso App is a mobile application for iOS and Android which allows users to directly connect to Delta Controls devices and configure them through BLE or NFC.

Key Features

- + Provision Delta Controls devices without the need for a network connection.
- + Calibrate & monitor sensor data.
- + Review and adjust network configuration, device names, & time settings.
- + Upgrade Delta Controls device firmware.
- + Load Delta Controls device databases.

Provision, calibrate, monitor, upgrade, and configure Delta Controls devices.
