

Red5 FIELD

Key Features

- + Faster Provisioning and enhanced workflow.

- + Native BACnet MS/TP for seamless retrofits and interoperability.

- + Fully Programmable for Application Flexibility.

Flexibility. Foundation. Future.

Meet the next generation of Delta Controls MS/TP Building and Application controllers. Red5-FIELD offers faster processing, increased memory, and the power needed for advanced building control algorithms.

Red5-FIELD replaces the highly successful DAC product line, with an easy, pin-for-pin retrofit controller, increased GCL+ programming space and added USB port for future enhancements. It's a fully programmable, native BACnet MS/TP controller that comes in a variety of capabilities and I/O configurations to fit the needs of every project.

Give new life to your MS/TP
Controller Subnetworks.
