

Do it right.

Room Control

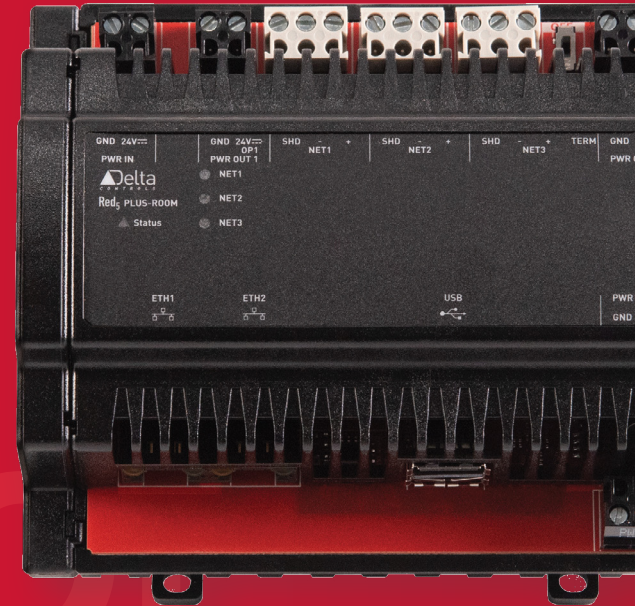

Red5 PLUS ROOM

Total Room Integration

The Red5 Room Controller is DIN rail mountable and combines modular I/O with room-level integration.

Red5 is a complete solution that combines HVAC, access and lighting control in a modular system. It combines multiple protocols and I/O points in one unit.

Control multiple rooms. Integrate with multiple systems.

Key Features

- +** **Universal I/O**
No more inputs and outputs. Use universal points to control or read from field equipment. Reduce engineering and product costs by being able to use every point on the board.
- +** **Excels at Controlling Multiple Rooms**
Control HVAC, access and lighting with just one system.
