

# eZNT

## Fully Programmable Customizable Thermostat

The eZNT reaches beyond the expectations of standard, network thermostat while remaining focused on cost-effectiveness. Fully programmable and with customizable button overlays, RGB backlighting, and NFC set-up, the eZNT provides the dependable, onboard control you expect from a Delta Controls thermostat. The eZNT provides options for analog outputs or FET relay outputs.

### Key Features

- + **Fully Programmable**  
Customize sequences through GCL+ programming.
- + **Flexible**  
On board I/O to handle a wide variety of unitary applications.
- + **Local trending and alarms**  
Simple setup for troubleshooting and monitoring equipment.

Use a wide array of applications to suit your specific requirements.
