BUILDING CANVAS

Delta Intelligent Building Technologies

Delta Controls' next major step forward in how intelligent buildings are designed, delivered and operated!

Building Canvas replaces site-based licensing and manual startup workflows with a user-based platform that brings virtual devices and the engineering tools to use them into one connected workspace.

CLOUD ENGINEERING	BUILDING CANVAS
FOUR CHANGES AT A GLANCE	
1 LICENSING Concurrent sites in packs of 5 + device tiers per site	Engineering seats assigned to individual users
2 WORKFLOW Manually start each site and connect a workstation	Everything starts automatically as you navigate
3 TOOLS Virtual devices + BACnet/SC connection only	Virtual devices + complete engineering workspace
4 LIMITS Purchased concurrent sites + devices capped per site	No concurrency, building, or device-count limits

LESS SETUP. FEWER LIMITS. ONE WORKSPACE.
