

Better Buildings Start Before Handoff

Most buildings arrive as drawings, databases, graphics, commissioning records and closeout folders. Canvas will create a living digital model during design and carries that context forward instead of asking teams to reconstruct it later.

One Connected Building Lifecycle

Engineer	**Deploy**	**Commission**	**Handoff**	**Operate**
Spaces + Systems	Data + Firmware	Guided Verification	Structured Asset	Service + Optimize

Better Outcomes at Every Level

Facilities Teams

SEE MORE. CHASE LESS.

- **FASTER TROUBLESHOOTING**
  See relationships + engineered intent.
- **RELIABLE RECORDS**
  Sequences + commissioning context stay accessible.
- **FEWER REPEAT PROBLEMS**
  Preserved knowledge keeps issues from starting at zero.
- **SIMPLER LIFECYCLE WORK**
  Maintenance, replacements and upgrades start with context.

Building Owners

PROTECT THE INVESTMENT.

- **BETTER HANDOFF**
  Structured intelligence - not scattered files.
- **LOWER LIFECYCLE EFFORT**
  Troubleshooting and upgrades start with context.
- **PERFORMANCE READY**
  Foundation for energy, compliance, analytics and optimization.
- **FUTURE FLEXIBILITY**
  Cybersecurity, predictive maintenance and new services.

Occupants

THE BUILDING JUST WORKS.

- **COMFORT THAT FOLLOWS PEOPLE**
  Light, temperature and air adapt to people - not just zones.
- **WELLNESS FELT, NOT ANNOUNCED**
  Quality, lighting and acoustics tune to context.
- **SPACES ADAPT TO INTENT**
  Rooms respond to density, activity and purpose.
- **ONE EXPERIENCE**
  Lighting, security and comfort act as one system.

One Platform. Five Brands. One Experience.

Most buildings arrive as drawings, databases, graphics, commissioning records and closeout folders. Canvas will create a living digital model during design and carries that context forward instead of asking teams to reconstruct it later.
