LOGO	NAME	DESCRIPTION / VALUE PROPOSITION	PURCHASE METHOD
	<b>Access Control Assistant</b>	Streamline migration from V3 to V4 card access system. Assists with managing sites of all sizes, and includes a feature for printing card badges directly from enteliWEB.	Special Order
	<b>Active Session Manager</b>	Allow administrator to view and manage (close) active user sessions on enteliWEB.	Special Order
	<b>Advanced Alarm Messaging</b>	Customize alarm messages and send to 3rd party platforms such as Telegram and MessageBird.	Licensing Portal
	<b>Advanced Points List Widget</b>	A more customizable version of the standard enteliWEB points list widget. Re-order points, set custom color and font size, and download/upload widget configuration in JSON format for transferring between servers.	Licensing Portal
	<b>Alarm Email Scheduling</b>	Direct alarms to different users or user groups dependent on the time of day or week. Send alarms to on-call service on evenings and weekend, and regular maintenance staff during regular weekday hours.	Licensing Portal
	<b>Alarm Escalation</b>	Escalate alarms to higher levels within organization after having gone unresolved for specified time periods.	Licensing Portal
	<b>Alarm Kiosk</b>	Touch-based active alarms view focused on tablets/touchscreen devices.	Special Order
	<b>Alarm Monitor 2</b>	An updated and customizable per-user enteliWEB alarms list. Re-define columns and colors, add persistent or temporary notes, show actionable instructions. Combines BACnet Alarms and enteliWEB System Alerts.	Special Order
	<b>Alarm Statistics</b>	Identifies and visualizes top 10 alarms and events over a variable time range. Enables operations staff to focus on persistent problem areas to optimize their systems.	Special Order
	<b>BMS Reporting</b>	A suite of custom reports that cover topics including: Access Control, Card Users, After-Hours Costing, Energy Consumption, Alarms and Alerts, Schedules and Calendars, Devices, Trendlogs, enteliWEB Users/Groups.	Free on PDS Product Page
	<b>Bookmark Module</b>	Provides user defined links within an enteliWEB accordion for ease of access to other web pages.	Special Order
	<b>Bulk TL Reporting</b>	Provides a raw CSV export of consumption meter data by Email or via FTP server for use in 3rd party reporting system.	Special Order

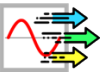

LOGO	NAME	DESCRIPTION / VALUE PROPOSITION	PURCHASE METHOD
	<b>Card User Import</b>	Synchronize Access Card Users via live connection with LDAP or import from a CSV file, to streamline access control system upgrades to Delta Controls.	Licensing Portal
	<b>CMMS Module</b>	Sends alarm information to a Computerized Maintenance Management System (CMMS) for automated issue assignment to maintenance personnel. ServiceWorks Global and FSI are currently supported integrations.	Licensing Portal
	<b>Commissioning Module</b>	Provides a streamlined user interface for commissioning a site. Manage commissioning of objects through a purpose-built workflow.	Licensing Portal
	<b>CUBE Integration Module</b>	Program BACnet devices based on configuration created in the CUBE USA business management platform.	Free on PDS Product Page
	<b>Data Transfer Module</b>	Transfer Data between enteliWEB Sites, or collect data from a number of online weather and energy-related websites. Use accurate weather information and forecast data to make informed control decisions.	Licensing Portal
	<b>Datapoint Counter</b>	Export graphic bindings lists and live-value screenshots as PDF to CSV files for documentation and troubleshooting. Validate bindings and find dead links to unavailable BACnet objects.	Special Order
	<b>Device Snapshot Tool</b>	Run device diagnostic reports in batches, including device statistics, object values, trendlogs, and network diagnostics.	Free on PDS Product Page
	<b>Dual Level Admin</b>	Multi-level administration scheme for enteliWEB. Allows a high-level administrator to allow lower-level administrators to manage users without giving them full enteliWEB administration access.	Special Order
	<b>Earthright Energy Dashboard</b>	Attractive, easy-to-understand public energy dashboard designed for use on large screen displays.	Licensing Portal
	<b>Energy Copy Module</b>	Allow for meters and metering structure to be copied and re-loaded between enteliWEB instances.	Special Order
	<b>enteliPROG</b>	Create a flexible offline library of objects organized in 'bricks', that can then be selected for rapid creation of controller databases.	Special Order
	<b>enteliSEARCH</b>	Keyword full text search of both graphics and enteliWEB descriptors. Identify graphics with specific text strings or bindings for quick replacements and update of systems.	Special Order
	<b>enteliVIZ Notepad</b>	Virtual notebook for the exchange of information between operators. Multiple notes can be freely created and commented on by different users to match with varying systems or graphics.	Special Order

LOGO	NAME	DESCRIPTION / VALUE PROPOSITION	PURCHASE METHOD
	<b>enteliVIZ Permissions Module</b>	Restricts access to enteliVIZ graphics for specific users/groups.	Special Order
	<b>enteliVIZ Workflow Module</b>	A graphics workflow improvement tool that allows users to create enteliVIZ graphics more efficiently. Use spreadsheets to link points to pre-created graphic templates for rapid deployment.	Free on Delta Support Website
	<b>Enterprise Scheduler</b>	Manage interdependent sites scheduling from a single intuitive interface, to maximize scheduling efficiency and reduce unnecessary equipment runtime. Allows for effective management of campus and district-wide events and days-off.	Licensing Portal
	<b>Facility Maintenance</b>	Facility Maintenance add-on for enteliWEB. Allows operators to document equipment maintenance records, link control system data, and utilize a mobile app for easy field access to information via QR codes.	Special Order
	<b>Facility Scheduler</b>	Synchronize Event Management System (EMS) schedules with BACnet schedules. When spaces are scheduled to be in-use by staff, the BMS will run equipment with an optional pre-condition time period. Equipment remains off to save energy when spaces are not in use.	Licensing Portal
	<b>File Manager</b>	Allows files to be uploaded to enteliWEB and later retrieved through a UI.	Special Order
	<b>Mail</b>	Email client within enteliWEB that facilitates the administrator to send mass emails to users or groups within enteliWEB to notify of maintenance or other system-wide announcements.	Special Order
	<b>Meter Correction</b>	This module enables both bulk and automated correction of erroneous meter data in enteliWEB's energy management system. Apply corrections to ranges of data entries known to be flawed.	Free on PDS Product Page
	<b>Meter Data Export</b>	Provides a raw CSV export of consumption meter data by Email or via FTP server for use in 3rd party reporting system.	Special Order
	<b>Meter Monitoring Module</b>	Periodically check the status of the enteliWEB energy system and ensure that meter data is being imported. Generate enteliWEB alerts when meter data has failed to update.	Special Order
	<b>Network Tool</b>	Maps out BACnet networks connected to enteliWEB, and provides other useful network support and troubleshooting features.	Free on PDS Product Page
	<b>OpenADR Integration</b>	Integrate to the OpenADR protocol via enteliWEB.	Special Order
	<b>Optigo Integration Module</b>	Uploads Wireshark captures generated directly from enteliWEB to Optigo's Visual BACnet service. View and configure Optigo switches directly from enteliWEB.	Free on PDS Product Page

LOGO	NAME	DESCRIPTION / VALUE PROPOSITION	PURCHASE METHOD
	<b>Permission Export</b>	Export all enteliWEB users and groups with permissions to PDF for documentation purposes.	Special Order
	<b>Replication</b>	Replicates enteliWEB components such as Graphics and Widgets, as well as Virtual Multi Trends and enteliVIZ Notepad data from a parent enteliWEB to a child enteliWEB(s) serving as backup.	Special Order
	<b>Report Copy Module</b>	Allow for reports and reporting structure to be copied and re-loaded between enteliWEB instances.	Special Order
	<b>Tenant Billing</b>	This enteliWEB add-on provides Tenant Billing functionality with a variety of different reports and configuration objects.	Free on PDS Product Page
	<b>TKE Integration</b>	Integrate to the TKE Elevator Security System to enable/lock out floors based on enteliWEB (V3) access.	Special Order
	<b>Virtual Multi Trend</b>	Front-End Software Multi-Trend view that replaces need for BACnet MT object. View up to 8 TLs together 'on the fly' with advanced export options and custom tree structure.	Special Order
