

Do it right.

ZCU™

ZONE CONTROL UNIT WITH FACTORY-INSTALLED CONTROLS AND PIPING

With ZCU you add value and mitigate risks, with standardizing product components for a facility owner/manager.

Benefits:

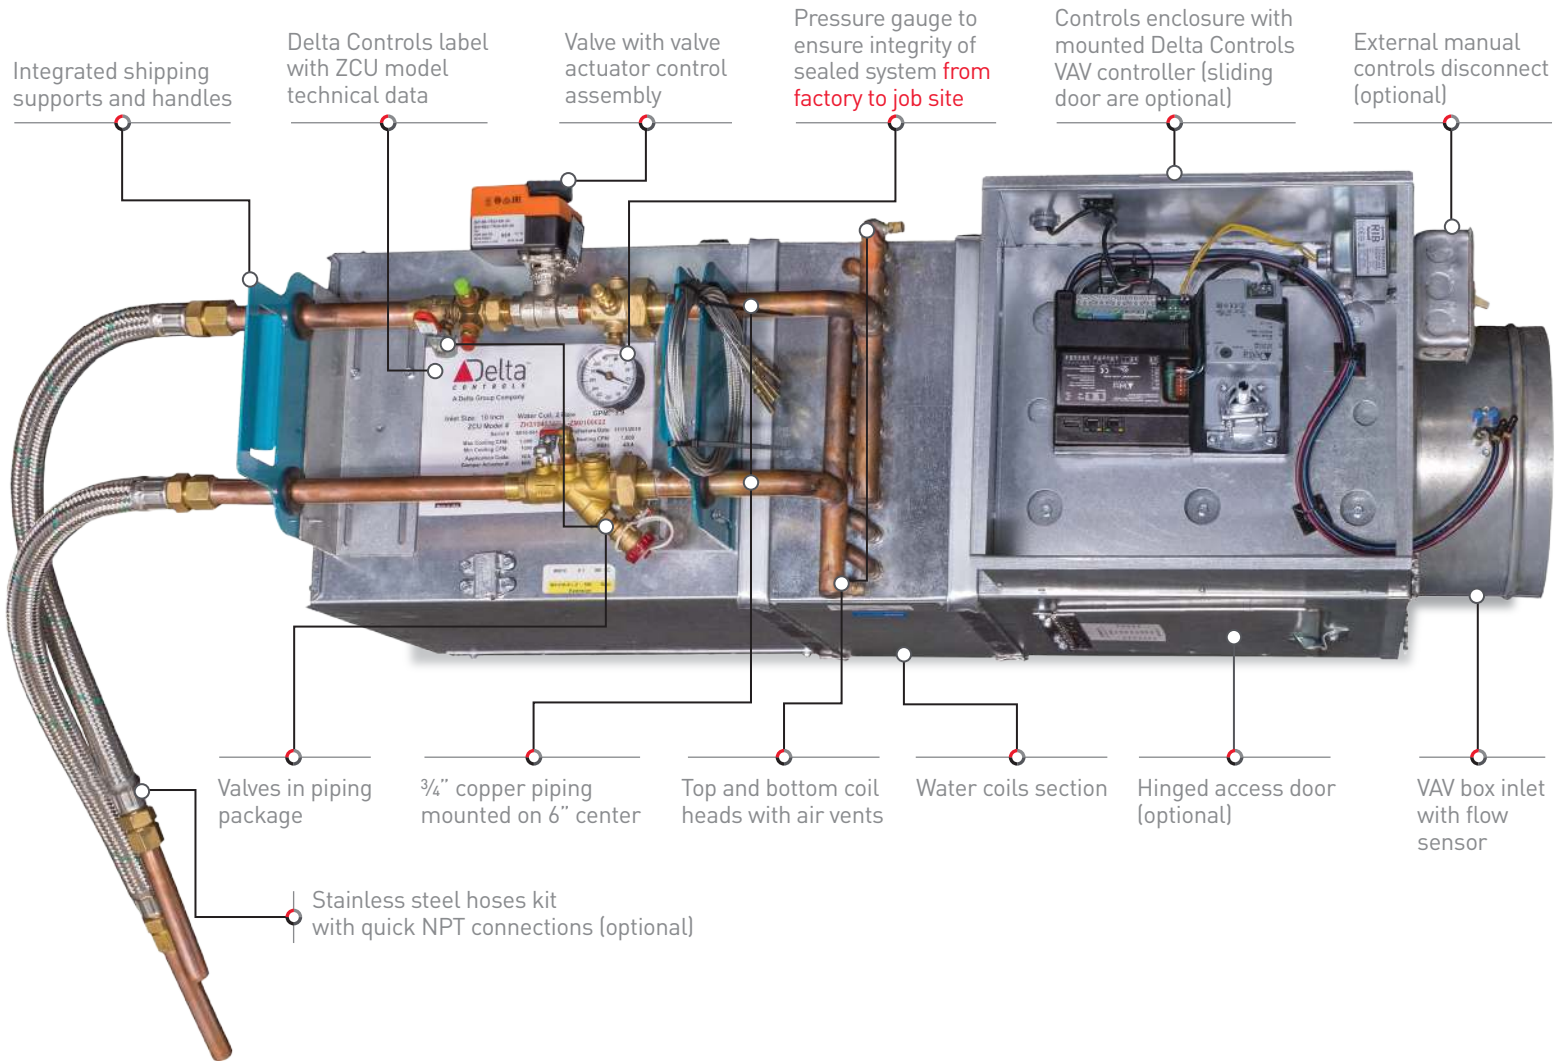

- Complete, engineered VAV;
- Increased profitability/lowest total construction cost;
- Quickest construction time;
- Reduced risk with single source of responsibility;
- High product quality and structural strength suitable for standard VAV applications and seismic sensitive verticals;
- Ready to install!
- Drop-shipped to the site location;
- Reduced cost and time to project completion;
- Cost savings on delivery, installation labor and material per zone.

Product Highlights:

- Includes controls, valves, damper, actuators, coil and piping, integrated shipping supports and handles;
- Pre-programmed, powered up, pressurized and commissioned;
- Pre-fabricated wiring harness, plug-and-play, UL/ULC 508A;
- Shipped from factory 100% defect-free!
- Validation package with pictures of each completed ZCU before leaving factory;
- Field-verifiable pressure integrity with a gauge attached, ensuring no leaks;
- Plug-and-play product!

ZCU Product Description:

The Zone Control Unit (ZCU) is a pre-piped factory solution with integrated Delta Controls VAV controller. It is a plug-and-play product, factory pressure tested, and made-to-order. This solution dramatically reduces costs and mitigates risks of field installation.

ZCU includes Delta VAV controller from either eZVP or DVC family providing seamless integration to any BACnet system.

Save project costs on delivery, installation labor and material with this high quality bundled solution!
